

VIKRAM DEVARAMPATI

Entry Level Graduate | Software Developer

Mobile: +91 9392571278 Email: vikramadityadevarampati@gmail.com LinkedIn: linkedin.com/in/Vikram Location: Hyderabad

Summary

Seeking an entry-level software developer role to apply academic programming skills in active projects, aiming to learn from experienced professionals and contribute effectively to innovative solutions.

Education

| | |
|---|---|
| Bachelor's Degree in Branch KKR&KSR Institute of Technology and Sciences | July 20XX – August 20XX CGPA – XX |
| Board of Intermediate Education College Name | March 20XX – May 20XX Percentage – 86% |

Technical Skills

- Programming Languages: Java, Python, C, C++ (Basics)
- Database Technologies: SQL, MongoDB
- Frameworks & Libraries: Spring Boot
- Web Development: HTML, CSS, JavaScript
- Data Structures
- Database Management Systems

Work Experience

| | |
|---|----------------------|
| MAKE SKILL Software Developer Internship | May 2023 – June 2023 |
|---|----------------------|

- Executed 100% of assigned Software Development Life Cycle activities, mastering Agile methodologies for project management.
- Achieved proficiency in Spring Boot, demonstrating adherence to best practices in dependency injection, component lifecycle, and state management.
- Analyzed and comprehended of technical design documents, ensuring precise interpretation of architectural and senior developer instructions.
- Implemented 100% of software solutions based on technical specifications, maintaining alignment with project goals and requirements.

| | |
|------------------------------------|-------------------------|
| YHILLS Web Developer Internship | March 2023 – April 2023 |
|------------------------------------|-------------------------|

- Spearheaded collaborative efforts with cross-functional teams, achieving a 30% increase in productivity in building high-quality, responsive user interfaces.
- Implemented stringent code review processes, resulting in a 25% reduction in software bugs and ensuring adherence to best practices in software engineering.
- Orchestrated seamless communication with product owners, grasping detailed requirements with accuracy, and assumed responsibility for the entire development lifecycle.
- Executed design principles facilitating effortless customization and extension of product functionality, leading to improvement in adaptability and scalability.

Projects

| | |
|--------------------|-------------------------|
| E-Commerce Website | June 20XX – August 20XX |
|--------------------|-------------------------|

- Developed front-end UI for E-commerce website using HTML, CSS, and JavaScript, achieving a 25% increase in user engagement metrics within the first month.
- Implemented responsive design principles to ensure optimal viewing experience across all devices, resulting in reduction in bounce rate.
- Enhanced website performance by optimizing codebase and implementing lazy loading techniques, leading to improvement in page load speed.
- Integrated secure payment gateways using JavaScript libraries, ensuring seamless transactions and achieving a 95% customer satisfaction rate.

Certifications

- Certified in Database Management Systems
- Earned Certification in Web Development with HTML, CSS, and JavaScript
